MANICURE AND PEDICURE SERVICE

WHAT TO LOOK FOR AND ASK:

- You have the right to ask the Personal Service Worker (PSW) to explain how they clean and disinfect their equipment before the service begins.
- The business must have a sink with liquid soap and paper towels for the PSW to wash and dry their hands.
- The PSW must wash their hands before they touch you.
- Make sure the business does not reuse tools on you that were used on someone else without first cleaning and disinfecting them. All instruments used on you must be clean.
- New equipment and supplies such as emery boards, nail files, wooden cuticle pushers, foam toe separators, pumice stones, buffing blocks and towels must be used for each client.
- Make sure the footbath has been cleaned and disinfected and that fresh water is used for each client.

SAFE HEALING:

- If the skin around your nails becomes painful, red or inflamed after your manicure/pedicure, see a doctor.
