Purpose	1
Summary	1
Cases Over Time.....	1
Case Characteristics.....	4
Outbreaks	6
Data Notes & Sources	7
Data Tables	8

Purpose

This daily report provides an epidemiologic summary of COVID-19 activity in Ottawa to date. The report includes the most current information available from the COVID-19 Ottawa Database (COD) as of 2:00 pm May 6, 2020 and the integrated Public Health Information System (iPHIS) as of 4:00 p.m. May 6, 2020.

Summary

- 1,579 laboratory-confirmed cases, including 141 deaths, have been reported in Ottawa.
- This includes 21 new cases and 2 new deaths since the previous report.
- There are 24 ongoing outbreaks in [institutions](#).

Cases Over Time

Figure 1. Cumulative epidemiological curve of Ottawa residents with confirmed COVID-19, by the EARLIEST of onset date, test and reported date or date of death

Notes:

1. Data are from the COD as of 2:00 p.m. on May 6 2020.
2. The onset date is the earliest of symptom onset, laboratory testing, and reporting dates. This means that in the graphs, cases are shown based on when the person's symptoms started, or if that is not known, the date that they were tested. If the test date is not known, the date that the case was reported to public health is used. As the case is investigated and more information is available, the dates in the graph are updated.
3. Confirmed cases are those with a confirmed COVID-19 laboratory result as per the Ministry of Health Public health management of cases and contacts of COVID-19 in Ontario. March 25, 2020 version 6.0.
4. A patient's exposure may have occurred up to 14 days prior to onset of symptoms.
5. *Symptomatic cases occurring in approximately the last 14 days are likely under-reported due to the time for individuals to seek medical assessment, availability of testing, and receipt of test results.

Figure 2. Epidemiological curve of Ottawa residents with confirmed COVID-19, by the EARLIEST of onset, test, and reported date, by outbreak association† (n=1,579)

Notes:

1. Data are from the COD as of 2:00 p.m. on May 6, 2020.
2. Confirmed cases are those with a confirmed COVID-19 laboratory result as per the Ministry of Health Public health management of cases and contacts of COVID-19 in Ontario. March 25, 2020 version 6.0.
3. †Cases are associated with a specific, isolated community outbreak; a healthcare institutional outbreak; or no known outbreak (i.e., sporadic).
4. A patient's exposure may have occurred up to 14 days prior to onset of symptoms.
5. *Symptomatic cases occurring in approximately the last 14 days are likely under-reported due to the time for individuals to seek medical assessment, availability of testing, and receipt of test results.
6. Healthcare institutions include long term care facilities, retirement homes, and hospitals.
7. The province has had to limit testing to priority groups. Since only a small fraction of all the persons who were infected with the COVID-19 virus were tested, the number of reported confirmed community cases underestimates the actual number of infections. Information on overall infection rates in Canada will not be available until large studies on COVID-19 antibody presence in blood serum are conducted. Based on available information, the actual number of infections may lie from 5 to 30 times or more than the reported number of cases.¹

Case Characteristics

Table 1. Age, gender and occupation (health care worker or first responder) of Ottawa residents with confirmed COVID-19

Measure	Number	Percentage
Case count	1,579	-
Change from previous report	21	1% increase
Age, median (range)	57 years (4m-105y)	-
Age		
0-9 years	14	1%
10-19 years	36	2%
20 to 29 years	154	10%
30 to 39 years	200	13%
40 to 49 years	224	14%
50 to 59 years	234	15%
60 to 69 years	206	13%
70 to 79 years	141	9%
80 to 89 years	202	13%
90+ years	167	11%
Unknown	1	<1%
Gender		
Female	923	58%
Male	649	41%
Unknown	7	<1%
Health care workers and first responders	397	25%

Note:

1. Data are from the COD as of 2:00 p.m. on May 6, 2020.
2. Confirmed cases are those with a confirmed COVID-19 laboratory result as per the Ministry of Health Public health management of cases and contacts of COVID-19 in Ontario. March 25, 2020 version 6.0.

Table 2. Age, gender and occupation (health care worker or first responder) of Ottawa residents with confirmed COVID-19 who have died

Measure	Number	Percentage
Cumulative cases	1,579	
Cumulative deaths	141	9%
Change from previous report	2	1% increase
Age, median (range)	86 years (39-105)	
Age		
0-9 years	0	0%
10 to 19 years	0	0%
20 to 29 years	0	0%
30 to 39 years	1	1%
40 to 49 years	0	0%
50 to 59 years	5	4%
60 to 69 years	7	5%
70 to 79 years	20	14%
80 to 89 years	59	42%
90+ years	49	35%
Unknown	0	0%
Gender		
Female	75	53%
Male	65	46%
Unknown	1	1%
Healthcare workers and first responders	0	0%

Notes:

1. Data are from the COD as of 2:00 p.m. on May 6, 2020.
2. Confirmed cases are those with a confirmed COVID-19 laboratory result as per the Ministry of Health Public health management of cases and contacts of COVID-19 in Ontario. March 25, 2020 version 6.0.

Outbreaks

Figure 4. Total number of COVID-19 outbreaks in Ottawa institutions³

Notes:

1. Data from iPHIS as of 4:00 pm on May 6, 2020.
2. 18 outbreaks are closed and 24 are active. Investigation and data entry are ongoing.
3. Institutions include long-term care homes, retirement homes, group homes (other) and public hospitals.

Data Notes & Sources

Data extracted represent a snapshot at the time of extraction and may differ in previous or subsequent reports. These data sources are used:

- 1) Case information
 - a. Data are from [Ontario Data Catalogue](#) of confirmed positive cases of COVID19 in Ottawa downloaded 10:30am on May 6, representing data pulled from the Ottawa Public Health COVID-19 Ottawa Database (COD) as of 2:00 p.m. on May 6, 2020.
- 2) Outbreak information
 - a. Ontario Ministry of Health, integrated Public Health Information System (iPHIS), extracted by Ottawa Public Health at 4:00 p.m. each day.

iPHIS and the COD are dynamic disease reporting systems that allow for ongoing updates to data previously entered. Data extracted from these databases represent a snapshot at the time of extraction and can be different in previous or subsequent reports.
