Data sources and notes:

1. Data reported to Ottawa Public Health, as recorded in integrated Public Health Information System (iPHIS), Ontario Ministry of Health and Long-Term Care (MOHLTC). Season to date data include data reported between September 1, 2018 (Week 35, 2018) and the current reporting week.

Note: *Health Protection and Promotion Act*, R.S.O. 1990 (HPPA) and the Ontario Public Health Standards: Requirements for Programs, Services, and Accountability does not require deaths among lab-confirmed cases of seasonal influenza to be reported to the local board of health. Therefore the number of deaths among lab-confirmed cases of influenza cases reported in this report only represent deaths Ottawa Public health has been made aware of at the time of report preparation. Furthermore, [lab testing](#) for influenza is only available to hospitalized patients and up to 4 patients per institutional respiratory infection outbreak.

2. Percent-positivity among viral respiratory specimens tested by Eastern Ontario Regional Laboratory Association (current reporting week) and Public Health Ontario Laboratories (previous reporting week).

Note: Additional information on respiratory viral pathogen detections among select laboratories in Canada can be accessed using [Centre for Immunization and Respiratory Infectious Diseases \(CIRID\)](#), Public Health Agency of Canada data sources
