1. Data reported to Ottawa Public Health, as recorded on iPHIS, MOHLTC. Season to date data include data reported between September 1, 2018 (Week 35, 2018) and the current reporting week.

**\*\*Note:** *Health Protection and Promotion Act*, R.S.O. 1990 (HPPA) and the Ontario Public Health Standards: Requirements for Programs, Services, and Accountability (standards) does not require deaths among lab-confirmed cases of seasonal influenza to be reported to the local board of health. Therefore the number of deaths among lab-confirmed cases of influenza cases reported in this report only represent deaths Ottawa Public health has been made aware of at the time of report preparation.

2. Percent-positivity among viral respiratory specimens tested by Eastern Ontario Regional Laboratory Association. On October 24th 2018, the most recent Public Health Ontario Laboratories data was not available

**\*\*Note:** Additional information on respiratory viral pathogen detections among select laboratories in Canada can be accessed using [Centre for Immunization and Respiratory Infectious Diseases \(CIRID\)](#), Public Health Agency of Canada data sources

3. Based on influenza activity level reported by Ottawa Public Health to Public Health Ontario
