The COVID-19 care and testing clinics are out-of-hospital clinics where people will be assessed by a healthcare provider, tested, and treated for respiratory illness, if required. Visits are by appointment only. They are equipped to do basic diagnostic tests, such as chest X-rays and lab tests. The Care and Testing Clinic will help people get treatment they require for respiratory illness, while helping keep Emergency Departments available for other emergencies.

You should come to the COVID-19 Care and Testing Clinics if:

- You have escalating symptoms of respiratory illness, including a fever or worsening cough and flu-like symptoms, and
- Are in need of medical attention

Please note: The COVID-19 Care and Testing Clinics are available by appointment only.

The reservation system will be launched in English only so that the service will be available as soon as possible to the population of the region. We are working closely with the company that developed the reservation system so that the French version is available as soon as possible.
