\* The vaccines in **bold print** are required for school attendance under the *Immunization of School Pupils Act*. Varicella vaccine required for children born in 2010 or later.

<sup>1</sup> Vaccines required at 12 months of age should be given on or after the first birthday.

<sup>2</sup> Influenza vaccination is recommended every year at 6 months of age and older.

<sup>3</sup> Following one dose of Tetanus, Diphtheria, Pertussis (Tdap) vaccine in adulthood, adults should receive a Tetanus & Diphtheria (Td) vaccine booster every 10 years.

<sup>4</sup> Pregnant persons in every pregnancy, regardless of Tdap immunization history receive one dose, ideally between 27-32 weeks of gestation.

<sup>5</sup> Pneumococcal-Conjugate-20 vaccine given ≥ 65 years of age.

<sup>6</sup> Herpes Zoster-Shingles vaccination (two-dose schedule) is routine between 65-70 and should be completed prior to 71<sup>st</sup> birthday.
