

Appendix A: Active Tuberculosis (TB) Disease Screening for Residents of Long-Term Care Homes and Retirement Homes

Name of Resident: _____ Date of birth: _____

The presentation of active TB disease in the elderly population can be atypical. The following is a list of signs and symptoms of active TB disease, including additional symptoms that may be present in the elderly. If any symptoms are present, which are not attributable to another diagnosis, the resident should be assessed by a health care provider for active TB disease. This checklist must be completed by a nurse, nurse practitioner or physician upon admission.

Symptom		Date of Onset YYYY-MM-DD	Comments
Current cough of more than 2 -3 weeks duration	☐ YES ☐ NO
